Adjustable Compression Fittings A10 Series

We offer two styles of adjustable compression fittings for use in mounting thermocouples into thick or thin walls. One style uses a standard NPT pipe thread while the other uses a straight thread with O-ring seal. Both are typically available from stock in 316 stainless steel (brass upon request).

Both styles are available for probe diameters from 1/16" to 1.0" OD. (other sizes upon request). The O-ring style is also ideal for use in thin-wall applications, glass containers, jar lids, etc. Simply put a jam nut on other side of container lid.

NOTES:

- If a (BR - brass) adjustable compression fitting is desired, list the Part No. and BR. *Example: A10-1-BR*
- If a (SS - stainless steel) adjustable compression fitting is desired, add the suffix SS to the Part No. *Example: A10-1-SS*

Pipe Thread Fitting Style - Specifications

Part No.	Tube OD T	Male Pipe Size P	A	B	C
A10-1	1/16	1/16	15/16	3/8	7/16
